- Public address & voice evacuation system
- Intelligent fire detection & alarm system
- Building management system
- Video Door Phone
- Home automation system

CCTV VIDEO SURVEILLANCE

The Company’s policy is to select only the highest quality equipment for any specific requirements. Varito Solutions are accredited partners with the suppliers of the most advanced Closed Circuit Camera equipment in the world and install, supply and commission CCTV Systems for a wide variety of clients. Varito Solutions include full integration with access management systems for Shopping Centre’s, Factories and many other Commercial and Government installations.

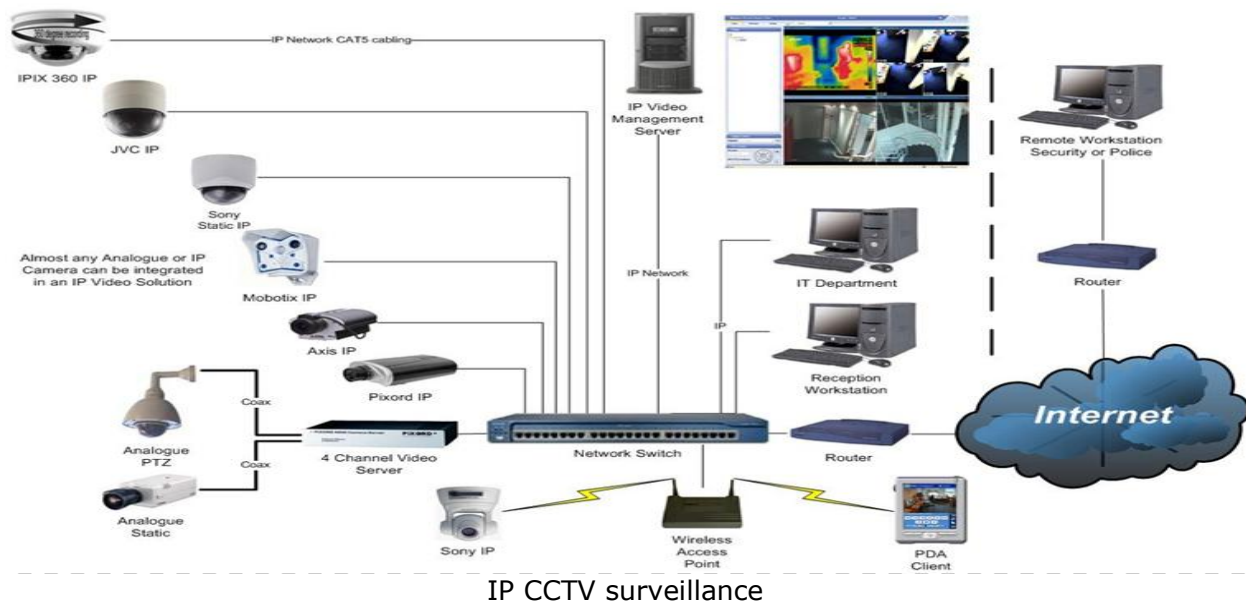

Analog Video Surveillance System

IP Based CCTV Surveillance

IP based cameras are the future. They work by turning images and audio into data then transmitting this data over a network or Internet connection. The ultimate benefit of this over analogue CCTV systems is greater flexibility, better performance and easier installation.

Whilst IP CCTV has been available for around 10 years, it is only in the last few years that the technology has matured, leading to the developments in Megapixel IP. Read below for a summary on the benefits of using IP based systems over traditional analogue systems.

INTELLIGENT FIRE DETECTION & ALARM SYSTEM

Comprise of various kinds of smoke detectors, heat detector, manual call points (break glass unit), optical sensors, response indicators etc. connected to the central control panel

Various type of Fire Alarm System are available viz.

- **Conventional Fire Alarm System** - SYSTEM SENSOR & MORLAY BY HONEYWELL
- **Addressable Fire Alarm System** FIRELITE/MORLAY/ ESSER BY HONEYWELL

ACCESS CONTROL SYSTEM

Access Control Systems can be stand alone or PC based, with proximity and SmartCard / MiFare readers.

The Company has installed a variety of Access Control Systems from single door to multi door, major systems such as Hospitals, Universities ,Police Stations. Varito can provide a system to control all aspects of personnel movement. The recording of transactions through doors, gates, turnstiles or elevators is easily accomplished. Automatic control of lighting and air-conditioning can also be achieved. Varito’s technicians have extensive

Experience with a number of systems. Bio-Metric System like palm reader/Fingerprint reader/Iris reader

Proximity & Smart Card Reader

PUBLIC ADDRESS SYSTEM

A public address system, abbreviated PA system. The term PA system refers to an audio transmission system used in institutional & commercial buildings, in which input from microphone or pre-recorded music is amplified & sent to speakers throughout the building.

- Public Address System- BOSCH

BUILDING MANAGEMENT SYSTEM

Building Automation Systems main focus is on Automation of utility services and increase in the comfort of the working environment which can improve the productivity and also contributes to Energy Conservation.

IBMS System will make the building intelligent by use of technically advanced systems that fully integrate the control of Lighting, Heating, and Ventilation, air-conditioning, Plumbing, Fire Alarm and other major building utilities.

Expectations of Client from IBMS

- Reduce energy consumption
- Reduce operating and maintenance costs
- Ensure security for people and property
- Increase occupancy and rental income
- Provide centralized reporting for all utilizes and services
- Create a comfortable and productive working environment
- Cost effective to install
- Reliable and trouble free to operate
- Inexpensive to modify and expand
- Easy to operate and maintain
- Interfacing of third party devices

HOME AUTOMATION SYSTEM

Home automation systems use a computer to control various parts of a home, including lighting, appliances, and security systems. The goal is to automate day-to-day tasks such as turning on lights, adjusting the thermostat, and starting the coffeemaker. It can also be used to set up whole-house video and audio systems.

All of the components are linked to a central computer, which may use buttons, touch screens, keypads, remote controls, or other devices. Virtually any part of a home can be controlled by an automated system.
